

Comments from The Norwegian Scientific Committee for Food and Environment (VKM) on herbicide tolerant maize MON 87419 (EFSA-GMO-NL-2017-140)

Food and feed safety assessment

1. VKM welcomes information on herbicide residue levels and their relevant metabolites in applications for herbicide tolerant GM-plants. Data on dicamba and glufosinate - ammonium residue levels, including their relevant metabolites, e.g. formaldehyde from dicamba, in plant material from field studies would support the assessment of food, feed and environmental safety.
